## WestGroupe Reveals New Evatik Releases

WestGroupe has added two optical styles to their men's Evatik line. The lighter the glasses, the more comfortable they are to wear; that's the idea behind the new Evatik E-9120. Made of ultra-thin handmade acetate, this lightweight frame in a modified rectangle shape and matte finish combine comfort and the latest trends. The E-9121 is also new with a semi-rimless, stainless steel frame with a modern take on the hinge. The unique screwless spring hinge ensures that the frames remain intact and do not become loose or out of shape.
