nouvelle collection de lunettes EVATIK Juillet 2017

EVATIK July 2017 releases

EVATIK welcomes two new summer styles that harmoniously combine interesting textures, refined finishes and luxury details with the clean design that distinguishes the brand. The latest eyewear and fashion trends are elevated with top quality materials and contemporary color options to create an understated yet sophisticated style for the modern, cosmopolitan man.

Looking for a linear yet elegant style? **E-9148** is the perfect fit thanks to its rich design elements. The laser treatment on the temples creates a brushed, textured finish that is truly unique, while the custom designed rivet hinge and metal end cap give the frame a luxurious, vintage look. The combination of a flat metal brow and regular eye wire make this rectangular frame extremely light and modern. E-9148 is available in Blue, Black and Olive Tort.

A sophisticated laser treatment is proposed on the front and temples of model **E-9149**, creating a textured, brushed finish. Combining the stylish custom designed rivet hinge and metal end cap with contemporary color options - Black, Olive Stripe and Grey Stripe - this acetate style adds a modern twist to its retro inspired look.

EVATIK is produced by WestGroupe; for more information please visit www.evatik.com or www.westgroupe.com.
