

EVATIK announces new November 2017 releases.

November 2017

State-of-the-art technology, top quality materials and refined design elements are showcased in the new EVATIK releases. Combining masculine styling with sophisticated patterns, textured details and subtle pops of color, the new styles provide a clean modern look that has an understated sense of luxury.

Made of Japanese titanium, model **E-9157** is strong, corrosion-resistant, hypoallergenic and extremely lightweight.

The monobloc titanium front eliminates the need for eyerim soldering, while the large, square shaped nose pads evenly distribute the weight of the frame, providing for a more comfortable

fit.

Refined details such as a beveling along the outside edge of the frame front with a subtle pop of color, paired with color blocked and ribbed patterned temples, give this frame a truly unique look.

Available colors include Brown Black, Black Red and Charcoal Grey.

Model E-9159 is an ode to 90's styling, but with a modern twist. A round shape – one of the most popular eyewear trends for 2017 – alongside a subtle easy-to-wear keyhole bridge matched by a sharp front with a diamond cut edge that creates a luxurious, architectural appeal and modernizes the vintage design.

Thin, flexible stainless steel temples allow for a perfect fit and premium comfort, while screwless hinges provide a smooth temple movement as well as an interesting design element.

In addition to vintage Tortoise Black and Black, this model is available in Crystal Black, that has a glossy, transparent hue that gives a minimalistic look.
