FOR TODAY'S MODERN MAN

Two new men's styles emerge from **EVATIK Eyewear**. Model **E-9157** is strong, corrosion-resistant, hypoallergenic and extremely lightweight. The monobloc titanium front eliminates the need for eyerim soldering, while the large, square shaped nose pads evenly distribute the weight of the frame. Available colors include brown/black, black/red (*shown*) and charcoal/gray. Model **E-9159** is round with a keyhole bridge matched by a sharp front with a diamond cut edge that modernizes the vintage design. Thin, flexible stainless steel temples allow for a perfect fit, while screwless hinges provide a smooth temple movement. **E-9159** is available in black, vintage tortoise/black, as well as, crystal black (*shown*).
