# LIGHTEN UP BUT GO BIG ON DESIGN

**OXIBIS**

CHARACTER AND TECHNICAL PRECISION

Model Doly features satin fronts and a discreet mesh pattern at the corner of the eye. When worn, this creates the subtle illusion of a cat's eye and a smoky eye effect. Boasting an ingenious flex hinge, the design exudes softness and romance, with a dash of character, according to the company. For the colour, the collection pays homage to pink, playing with a flattering variety of shades and combinations. Featured on some models are hues of blue, orange and saffron, as well as silver and gold metal finishes. Doly comes in three shapes; each one is available in four colour choices.

**VINYL FACTORY**

LESS IS MORE. THIS TIME ROUND

In line with the big trend of the season, Vinyl Factory has launched model Trimble, a metal design with a coloured acetate detail at the top, enhancing the look. The temples, while featuring the Vinyl Factory signature of the guitar shaped 'neck', are reinvented in gold with black vintage-inspired temple tips. Vinyl Factory has a passion for music, and all styles, whether minimalist or ornate, revisit the 1960s and 70s with irresistible design ideas and colourways in line with a chic French design aesthetic.

**EVATIK**

ROUND IS TRENDING

EVATIK model E-9156 capitalizes on the continued popularity of round frames as well as the new-found demand for metals. Combining a smart Japanese mono-block titanium front with beta titanium temples, E-9156 is strong, corrosion-resistant, hypoallergenic and lightweight. A laser cut split temple adds a subtle touch to an otherwise clean design while a custom titanium end cap on the temple tips is engraved with an "E", providing a discreet logo. This modern take on a retro look is available in black, grey and brown taupe. EVATIK is produced by Westgroupe.

**AMEYEWEAR**

ANCIENT INSPIRATION

AM Eyewear's 2018 collection 'Mayan Gold' is inspired by the ancient culture of the Mayan people. This season AM Eyewear has handcrafted a luxury range plated with 9 carat, 18 carat, and 22 carat gold, as well as combinations of silver, rose gold, and copper elements across frames, hardware and ZEISS lenses. The creative process for Mayan Gold invoked the crisp, cool tones of rainforests and the application of precious minerals to create bespoke artifacts. Mayan Gold sees the introduction of six new silhouettes, including the model pictured: Aulenti in black.
