Waiting for the Sun

Summer is coming and Storm London has released two new sunglass frames in readiness for it. The S605 SUN **(1)** is a bold square aviator frame with a flat top bar and keyhole bridge. Layered acetate moves from a black exterior to a 'signature Storm laser blue' interior, creating a clever colour play that will be exposed in the summer light. The masculine model is finalised with solid grey lenses and the Storm motif on its flexible hinges.

Storm's second summer instalment, S607 SUN **(2)**, takes a mixed material approach. An acetate frame front in a classic aviator style is connected by a keyhole bridge and horizontal top bar, this time curving down to meet stainless steel temples. Again, the hinges are adorned with Storm's logo and connect to the tortoiseshell interior of the frame front with the temple returning to acetate at the tips.

EVATIK

Three new styles for summer

Available in the UK through Ridgway Optical, Evatik's new 2019 ophthalmic frame collection comprises three new styles. The half-rimmed E-9188 model **(1)** has a laser cut groove on an almost flat brow, topped with a subtle colour line. Pierced temples start at the lug before converging on acetate tips that feature Evatik's motif on their inside.

A twist on the classic navigator shape, the E-9190 **(2)** has a handmade, horn patterned textured front that is half encompassed by a metal rim, top bar and bridge. Flat metal arms flow from the hinges down to acetate tips, again with the brands logo on the inside, that employ the same colours as the front.
