WESTGROUPE

Two titanium and three stainless steel models for men have been added to WestGroupe's EVATIK collection for fall 2021.

New titanium frames include the oversized softened square style E-9222, which is reminiscent of the '70s but is updated with colour on and within the eye rim.

For a sportier look, E-9223 is a sleek monoblock semi-rimless style with laser-cut detailing, highlighted by bold colour on the front and temple. Gradient colouring on the inside temple elevates the casual design, while colour-coordinated laminated temple tips add the perfect finishing touch.

Style E-9224 boasts an ultra-thin stainless steel front, accented with an Italian windsor rim. The rounded square shape is a fresh take on the round profiles that have been trending over the last couple of years, while the monoblock hinge and flattened thin temple maintain the overall vintage feel.

Adding to its large-size offerings, EVATIK has also launched two extended fit models, constructed from monoblock stainless steel.

E-9225, available in size 57-19-150, is a softened rectangle that works well with wide face shapes, while E-9226, in size 60-18-155, has the added head-space and temple length for those hard-to-fit men.
