Spotlight on Evatik

WestGroupe adds two new styles to its Evatik collection. Designed for today's modern man, the new styles offer rich colors with subtle yet impactful design details. Each frame ensures an easy-to-wear shape with contemporary flair. Rectangular style 9233 features monoblock stainless steel with handmade acetate temples and a two-tone metal decor. This style is available in three colorways including navy silver, charcoal gun and brown gold. Style 9234 offers a semi-rimless square shape with a monoblock stainless steel front. The overall design has an elevated sporty look with unique detailing and a laser-cut border along the temple, as well as a laser-cut groove on the top rim.
