

Evatik Adds Two New Models for Summer 2022

2022-06-23

Evatik's new summer release focuses on easy-to-wear shapes in acetate and stainless steel. The colour palette draws heavily from nature-inspired neutrals, with green tones adding freshness to the assortment. Not only are the new [Evatik](#) frames right on style, but their clean design allows for an effortless transition between professional to casual wear.

E-9239

The classic rectangular front of E-9239 is constructed from monoblock stainless steel which minimizes the need for additional soldering, ensuring a lightweight, durable design. Specialty screwless spring hinges add a modern design element as well as superior comfort, while the two-toned coloring is subtle, yet sophisticated. Available in colorways of Black Cobalt, Navy Orange, and Graphite Sage.

E-9240

E-9240 combines a handmade acetate front with stainless steel temples. The wrap-around metal endpiece flows seamlessly into thin, tapered temples for a sleek and seamless look. Designed for those requiring an extended fit frame, the narrow, rectangular eyeshape is perfect for the 58 eyesize, while the slightly bowed 150mm temples ensure a proper fit. Integrated spring hinges add extra comfort. Available in a mix of shiny and matte finishes and in a range of tortoise hues including Matte Grey Tort Gun, Matte Forest Tort Black, and Havana Black.

Evatik is distributed in Canada by [WestGroupe](#).
